ClearPak® 5000 Packaging Film Prevents Corrosion, Discoloration on Aluminum, Steel, Copper Parts

Alsip, IL - New [ClearPak® 5000](#) poly is a tested, approved, and now globally accepted packaging film for protecting aluminum, steel and other metals during storage and transit. Recently introduced by [Daubert Cromwell](#), CP5000 has proven to meet international standards and customer expectations as safe, effective, corrosion inhibitor material.

In rigorous industry and OEM testing, new CP5000 earned highest ratings as a quality corrosion inhibitor (VCI) film. Specifically, CP5000:

- Passes both TL8135-0034 and NACE TM0208, earning the highest grade possible.
- Meets TRGS 615 and TRGS 900.
- Is [RoHS compliant](#)
- All corrosion inhibitors within are [REACH-registered](#) allowing for metalworking companies to import their finished goods into the Europe Union.

Actual field performance test results show CP5000 film effectively prevents rust and discoloration on properly packaged steel, copper, and aluminum alloys. The flexible, strong, transparent poly -- tinted a unique shade of Daubert® blue -- is often used as a bin liner for automotive parts and other fabricated metals.

In addition to its technical efficacy, CP5000 meets criteria as an [environmentally friendly film](#) that is safe for use in the workplace. The bio-based, nitrite-free product is non-toxic, easy to handle. It is fully recyclable.
