RE: PFAS Chemicals

Per- and polyfluoroalkyl substances – known as PFAS, specifically perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), and their salts and structural isomers have been deemed hazardous substances under CERCLA. These substances are controlled and regulated by several international regulatory agencies including the U.S. EPA and E.U. ECHA.

This letter claims that Daubert Cromwell certifies that we do not use any PFAS substances in our products. Daubert Cromwell has never used this material in the past. We do not test for this material in the finished product.

If you have further questions or need information, please do not hesitate to contact us.

Sincerely,

Jonathan Brekan, PhD.
Vice President, Technology
Daubert Cromwell
