PRESS RELEASE

OneSource and Daubert Cromwell Align to Protect, Preserve Offshore Rigs

Alsip, IL, USA (April, 2020) – OneSource AS, the Norway-based preservation solution provider for on shore and offshore oil and gas and offshore rig preservation for stacking and lay-ups, has partnered with VCI manufacturer Daubert Cromwell to offer its comprehensive services globally.

This strategic alliance combines the best technical expertise in greenfield and brownfield projects, stacking, preservation and engineering with the VCI solutions proven to protect and extend the life of industrial equipment.

OneSource is recognized worldwide for delivering procedures, products and personnel for projects and long/short-term lay-ups, on time and on budget. By focusing on preservation as an integral part of maintenance services, it can cover the entire lifecycle of customer assets.

In addition to its Norwegian operation, OneSource has on-site presence in Singapore, Vietnam, Korea and Nigeria.

Daubert Cromwell manufactures and supplies OneSource with its full range of field-tested and proven VCI products for shutdown and stacking projects. It offers the most effective and customer-specified rust preventive oils, VCI films, plus emitters that meet Norsok requirements.

Daubert Cromwell is ISO certified, RoHS and REACH compliant. Corporate headquarters is in the US, with subsidiaries operating in Brazil, China, Europe and Mexico.
