

# VCI Packaging Guidelines

Do's and Don'ts for the proper use of VCI packaging to prevent rust on metal parts.

**NO**

Do not leave boxes of VCI poly or paper open.

**YES**

Replace unused sheets back into the box at the end of the shift.

**NO**

Do not handle unpainted parts with bare hands.

**YES**

Use gloves when handling bare metal parts.

**NO**

Parts must be completely covered. Cover all non-painted surfaces.

**YES**

Cover parts completely with VCI, with logo facing outward.

**NO**

Do not leave VCI bag open. Close the bag.

**YES**

Roll or fold bag so VCI stays inside to protect the part. Close and seal box.

**NO**

Parts should not touch cardboard, corrugated boxes or wooden pallets.

**YES**

Secure properly packaged parts to pallet.
