VCI Packaging Guidelines
Do’s and Don’ts for the proper use of VCI packaging to prevent rust on metal parts.

**NO**
- Do not leave boxes of VCI poly or paper open.
- Do not handle unpainted parts with bare hands.
- Parts must be completely covered. Cover all non-painted surfaces.
- Do not leave VCI bag open. Close the bag.
- Parts should not touch cardboard, corrugated boxes or wooden pallets.

**YES**
- Replace unused sheets back into the box at the end of the shift.
- Use gloves when handling bare metal parts.
- Cover parts completely with VCI, with logo facing outward.
- Roll or fold bag so VCI stays inside to protect the part. Close and seal box.
- Secure properly packaged parts to pallet.
